MIDEA VRF
MDV-V200WN1(AU)

Midea, established in 1968 is a public company listed and since July 2016 a Fortune 500 company offering one of the most comprehensive ranges in the home appliances industry. Midea specializes in air treatment (residential and commercial solutions), refrigeration, laundry, cooking appliances, small kitchen appliances, water appliances, floor care and lighting.

Midea is My True Blue Idea

Our objective is to deliver the best home solutions for every Australia family. Our home solutions are inspired by the ideas and needs of our Australian guests. Therefore, we created the slogan "Midea is My True Blue Idea".

MD Appliances Pty Ltd

Founded in 2018 as MD Appliances Pty Ltd, we proudly represents Midea's Air conditioning products in Australia. Our mission is to bring Midea's world-class air conditioning solutions to the Australian market, ensuring that homes and commercial buildings alike benefit from cutting-edge technology, energy efficiency, and superior comfort.

more than **$53.08B USD** of revenue in **2024**

serve customers in **100+** countries

40 global production centers

190K+ employees worldwide

global Fortune **277** company

7 years parts and labor warranty
For Hi-Wall/ Ducted/ Cassette/ VRF / Heat pump

5 years parts and labor warranty
For Window Box A/C

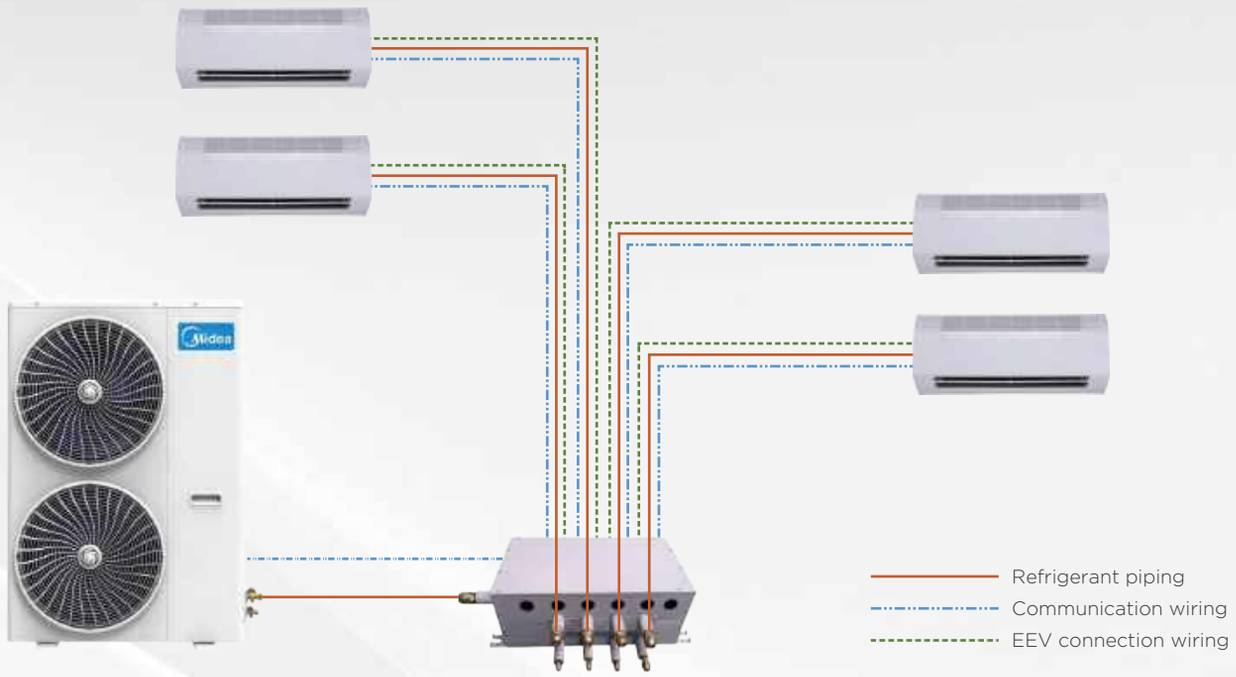

2 years parts and labor warranty
For Heavy Commercial Products

Local after sales service and support

All Flare* Connections, The Easiest VRF to Install

The system uses all flare connection which can greatly simplify installation. The multiple branch box with 1 to 2,3,4,5 or 6 options further simplify installation.

Note:
*Reused flared branch joints are not permitted for indoor use..

1 to 6 Indoor Units Connection

A single outdoor unit supports 1 to 6* indoor units, freeing up considerable space outside. Use your backyard more wisely with much more space available created by less number of outdoor units.

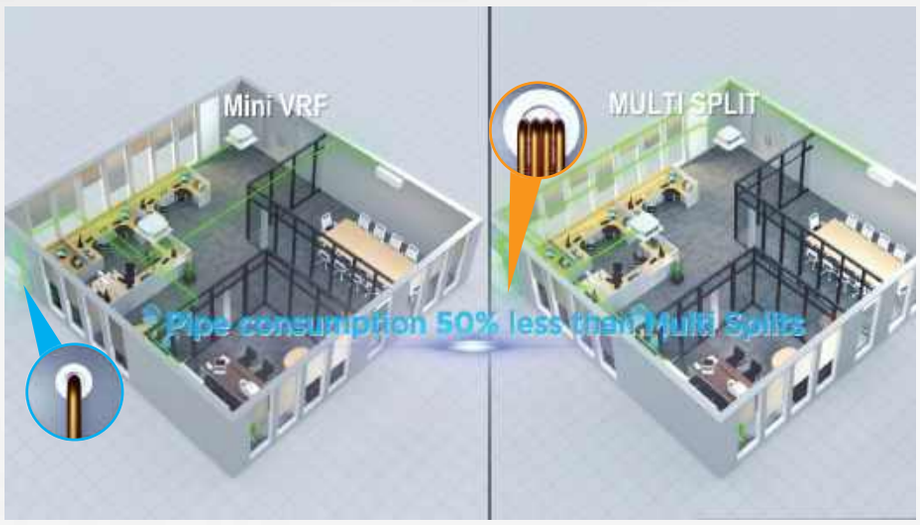

Branch Box	FQH-03A	FQH-04A	FQH-05A	FQH-06A
Max. number of indoorunit	3	4	5	6
Appearance				

*The combination ratio of indoor units and outdoor unit does not exceed 130%.

*The pictures of the Branch Box are for reference only, and the pictures are updated without notice.

Less Required Space for Mini VRF Installation

Mini VRF use flare connections instead of welding, which facilitates owners a lot to save their cost for installation, as well as avoid health hazard by welding such as strip-lighting or extra-high temperature.

Comparing with multi split, Mini VRF has some distinctive advantages as follows:

- less pipe space requirement
- Less pipe consumption
- No special requirement for pipe holes
- keep your house neat and tidy.

Longer Piping Capability

The Mini VRF provides a total piping length possibility of 80m, a maximum height difference between outdoor and indoor units of 30m. These generous allowances facilitate an extensive array of system designs.

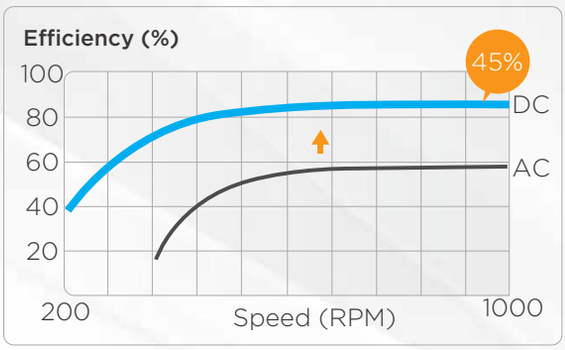

Full DC Inverter Technology

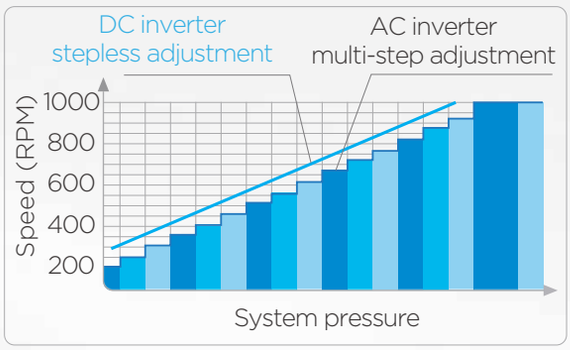

The Mini VRF uses full DC inverter compressor and fan motor to achieve high precision stepless speed adjustment according to system operation, and ensures that the system is always in optimum condition, operating more efficiently, more consistently and with less noise.

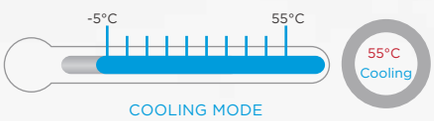

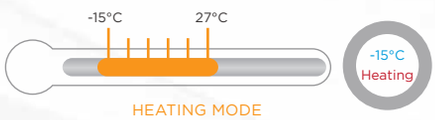

Wide Operation Range

Mini VRF can operate in a wide ambient temperature range. It can operate stably from -5°C up to 55°C in cooling mode and from -15°C to 27°C in heating mode.

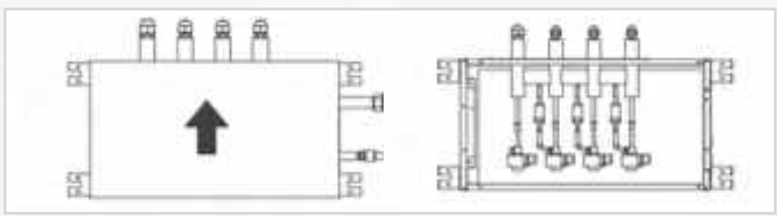

Branch Box Installation

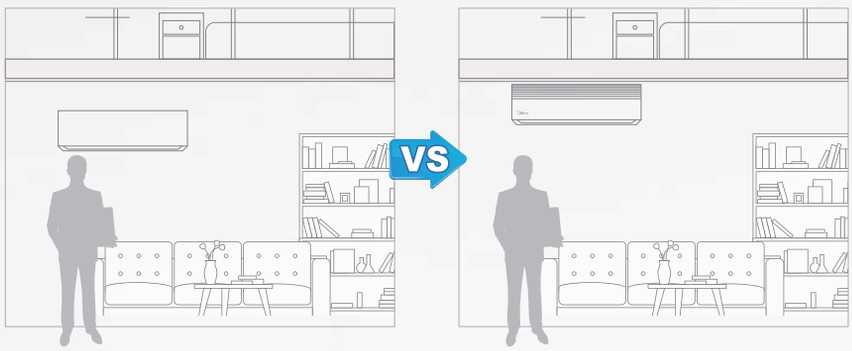

Incorrect installation direction

The electronic expansion valve inside the branch box must not be installed upside down (an inverted position results in valve flow regulation or valve closure issues due to gravity).

Ceiling Mounting

The Wall Mounted new heat exchanger is designed to meet the installation requirements close to the ceiling, and the minimum distance from the ceiling is 3cm.

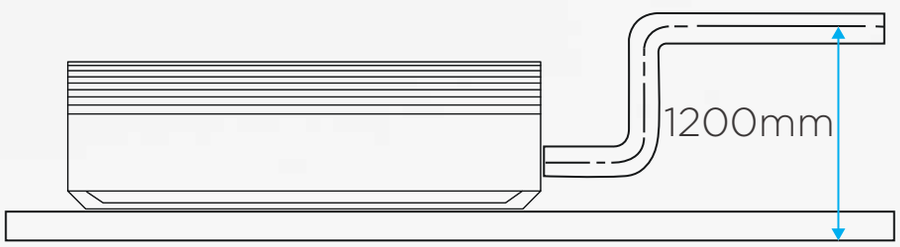

There is some distance from ceiling

The distance from the ceiling is 3cm

High-lift drain pump*

A drain pump with a 1200mm raise height is fitted as customized, simplifying installation of the drain piping.

*The drain pump is available as a customization option.

WiFi module*

With the built-in Wifi module, you can remotely control the power on/off, adjust the temperature, switch modes and other functions via SmartHome APP.

*Wifi module is available as a customization option

AIR FLOW*

Possibility to select automatic vertical and horizontal moving of the air discharge louvre, for uniform air flow and temperature distribution.

Up & Down

Right & Left

*Horizontal Swing function is available as a customization option for Wall Mounted.

Specifications

Outdoor unit

Model			MDV-V200WN1(AU)
Power supply		V/N/Hz	220-240/1/50
Heating[1]	Capacity	kW	21.0
	Power input	kW	5.0
Cooling[2]	Capacity	kW	15.5
	Power input	kW	4.0
Connected indoor unit	Total capacity		60-130% of outdoor unit capacity[4]
	Maximum quantity[5]		6
Ambient temp. operation range	Cooling	°C	-15-55
	Heating	°C	-20-27
Sound pressure level(cooling/heating)[3]		dB(A)	59/59
Refrigerant	Type		R410A
	Charge	Kg	4.4
pipe size	Liquid	mm	9.52
	Gas	mm	19.1
	Max. height difference	m	30(ODU up)
		m	20(ODU down)
	Max. piping length	m	80
Net dimension(W*H*D)		mm	902×1327×320
Packing dimension(W*H*D)		mm	1082X1406X434
Net/Gross weight		kg	103/111

Notes:
1. Indoor temperature 20°C DB; outdoor temperature 7°C DB, 6°C WB; equivalent refrigerant piping length 7.5m with zero level difference.
2. Indoor temperature 27°C DB, 19°C WB; outdoor temperature 35°C DB; equivalent refrigerant piping length 7.5m with zero level difference.
3. Sound level: Anechoic chamber conversion value, measured at a point 1 m in front of the unit at a height of 1m.
   During actual operation, these values are normally somewhat higher as a result of ambient conditions.
4. If you have a need for more than 6 Wall Mounted indoor units, please contact Midea.
5. 60-130% is system combination ratio, combination ratio=Sum of capacity indexes of the indoor units/Capacity index of the outdoor units
   *The above data may be changed without notice for future improvement on quality and performance.

3. The dimension is only the body size, excluding the size of the installation lug, connecting copper pipe, etc.

Victorian Energy Upgrades (VEU) Program

The Victorian Energy Upgrades (VEU) program assists households and businesses to reduce their energy bills and greenhouse gas emissions by providing financial incentives to install energy efficient equipment and appliances.
Midea has a suite of high efficiency products to suit all upgrade categories which attract the highest incentives in each program. We are proudly introducing to our range the Mini VRF series, which thanks to our labs advanced technology, are more energy efficient systems that will be further reducing carbon emissions while increasing financial savings through the incentives to the Victorian community.

For more information on the program please visit following website
VIC https://www.esc.vic.gov.au/victorian-energy-upgrades/about-victorian-energy-upgrades-program

VEU Climatic Region	Heating capacity(kW)	Cooling capacity(kW)	VEECs(res)**
			2025*
For upgrades in Metropolitan Victoria-Climatic region mild	21	15.5	84
For upgrades in Metropolitan Victoria-Climatic region cold	21	15.5	92
