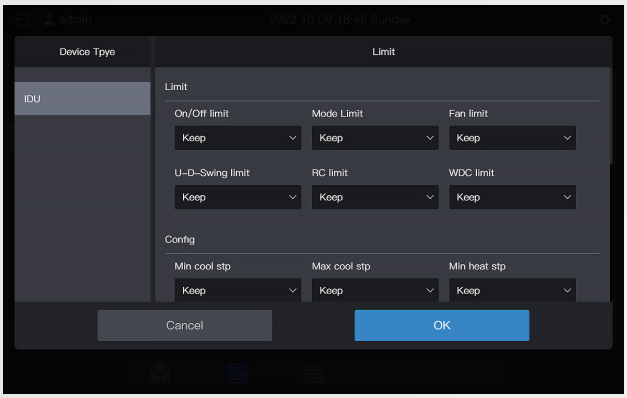
- Maximum 384 IDUs and 48 systems can be connected
- ODU parameter setting: Backup, Reset Backup, Silent Mode, Mode Priority, Emergency stop, DSM Setting, Midea ETA setting, Sensor backup and backup time setting
- IDU parameter setting: Away from home mode, Away from home mode room temperature range setting, Midea ETA setting
- Languages Supported: English, Chinese
- LAN Cable Support, Web access
- USB Support: Software update, report export
- Schedule Function and Simple schedule setting
- Group Management Function

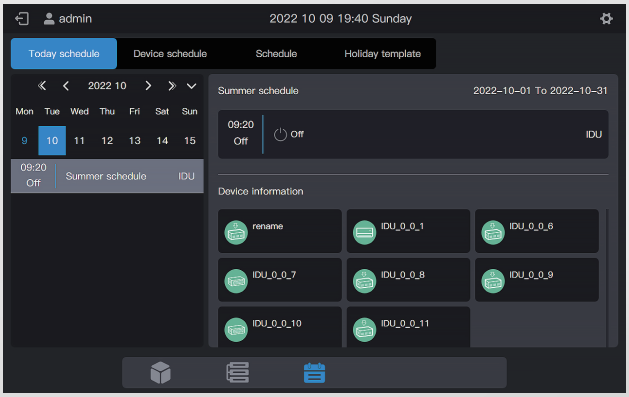
Energy Management

User can set limits on an indoor unit, such as operation temperature range, fan speed, mode, swing command, on/off command, romote controller signal and wired controller signal.



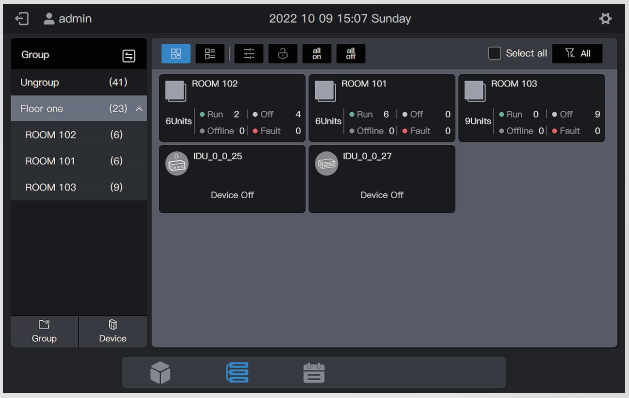
Schedule Function

The controller can be used to make a detailed schedule for the indoor units. The schedule can be set for the whole year.



Group Management

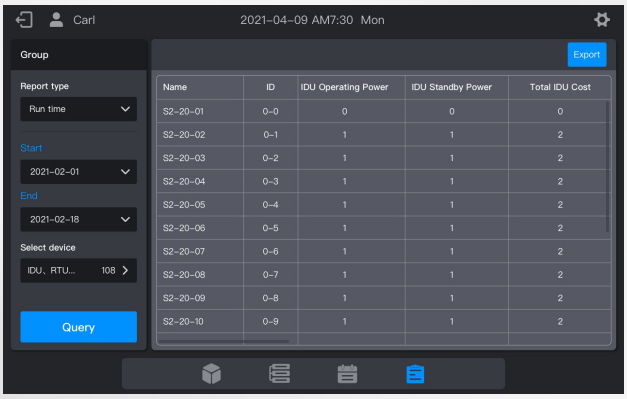
Units can be viewed according to group, system or location, making unit management clearer and more convenient.



Electricity Charge Distribution

The controllers use the patented Midea Calculation Method to estimate the electricity consumption of the outdoor units and then divide it among the indoor units so that the electricity charges can be equitably divided among building occupants.

*This function will be available at the end of Mar. 2023.



Touch Screen

Colorful touch screen and vivid display make operation more convenient and simple.

Outdoor Unit Configuration

Outdoor unit configuration and settings can be monitored and controlled without having to go outdoors.
