

WDC3-86T

appearance option

Key Features:

- Support for 14 languages
- Midea ETA function setting
- IDU dirty blockage rate display
- System energy efficiency decay display
- IDU buzzer sound turn off function
- Wired controller keypad lock function
- one to many control up to 16 IDUs
- Separately one-to-more control up to 16 IDUs
- Wired controller set temperature range limit
- Remote controller receiver and follow me function
- IDU and ODU Parameter setting and checking function
- IDU address setting & IDU/ODU error code checking function
- 2 controllers can be connected with one indoor unit as well as one group of indoor units
- IDU filter blockage display
- After hours function
- Weekly schedule and Extension power-off delay
- MSmartHome app can be used to control

Bi-directional Communication

The wired controller can query the system operating parameters thanks to the new bi-directional communication functionality. In addition, settings including static pressure, cold draft prevention and temperature compensation can be configured on the wired controller.

Buzzer Sound On/Off

The buzzer sound of the indoor unit can be turned off to create a quieter environment.

Main or Secondary Controller Setting

Two controllers can be used together with single indoor unit. Operating mode and settings would be set according to the most recent instruction received. The controller display screens are synchronized so that both displays update when a setting is adjusted.

one to many control/ Separately one-to-more control

One or two controller can be used to unify the settings across up to 16 indoor units. Separately one-to-more control function can realized one controller control up to 16 indoor units separately (invalid on slave controller)

2 Permission Levels

2 permission levels ensure users can easily access control functions and allow administrators convenient access to operating parameters.

Humidity setting

For some IDU, humidity adjustment is supported in DRY mode.

After hours setting

We can use the wired controller to set an automatic after hours function for the indoor unit.

Schedule Setting

The schedule function allows users to set multiple weekly schedules each with its own operating mode, temperature settings and fan speeds.
